THE KEY TO EFFICIENCY

# K-SERIES

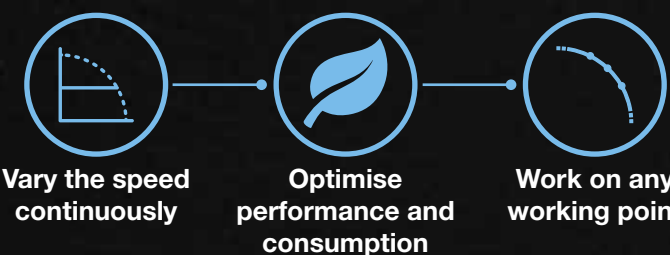

## The Key to efficiency

Efficiency, or *Koritsu* in Japanese, is the soul of our innovative range: K-Series, consisting of the best EBARA pumps integrated with the E-SPD+ inverter.

The fusion between the EVMS vertical multistage electric pumps and the integrated E-SPD+ frequency converter gave rise to the **EVMS-K**, the first of the new range.

The technical features of the two products mean that the EVMS-K can vary the speed continuously and operate on any working point, **thus optimising performances** and power consumption depending on the system's requirements.

A new product ready for use.

Technical Data						
Nominal flow rate [m <sup>3</sup> /h]	1	3	5	10	15	20
Max. operating pressure [bar]	16 / 25		16			
Liquid temperature	0°C ÷ +80°C					
Motor	ETM, 0.75 to 4 kW Single-phase 230V up to 2.2 kW Three-phase 400V up to 4 kW					
Inverter voltage	Single-phase 230V up to 2.2 kW Three-phase 400V up to 4 kW					

## Fields of application

### PRESSURISATION

- Pressure boosting and stabilisation for industrial plants
- Boosting and stabilisation of pressure in domestic/residential systems
- Water distribution for hotels, resorts, B&Bs, etc.
- Water distribution for wellness centres, spas, etc.
- Catering

### INDUSTRY

- Process applications in industrial machinery
- Industrial liquid handling
- Washing systems
- Car washes
- Pharmaceutical Industry
- Food industry

### IRRIGATION

- Domestic crops
- Parks/sports fields
- Gardens/nurseries
- Greenhouses
